Project 25X1A - Lease

25X1A 1. As previously pointed out by 25X1A of this office, the lease with the 25X1A contains two important typographical errors in the last proviso, and several blanks were not filled in in the printed part of the form.

2. It is understood that it is desired, for operational reasons, not to reopen the lease discussions with the 25X1A unless 25X1A absolutely necessary. Since any ambiguities caused by these defects in the lease will not operate to the disadvantage of the Government in this case, the lease is considered to be legally sufficient.
